Focus on Zodiac Seats

A strong commercial success

- A strong commercial success
 - High book to bill ratio and strong order book
 - 40% global market share for linefit in the last 4 years
- Owing to a full renewal of the seat range

A busy activity in development and production

- **Many Head of Version to develop**
 - Especially on new aircraft (B787)
- **Adapting rapidly our production system**
 - A strong increase in headcount
 - + 58% in Gainesville, TX
 - +23% in Santa Maria, CA
 - +97% in Chihuahua, Mexico
 - + 21% in Soliman, Tunisia
 - +18% in Issoudun, France
 - +12% in Cwnbran, UK
- **Coping with higher barrier to entry**
 - High level of customization
 - New rules for certification
 - Head twist measures for new generation of seats demanded by FAA

New tests for seats

- The FAA Requirement aims at reducing injury on passengers of oblique seats
 - Each occupant of a seat positioned at more than 18° angle (to the vertical plane containing the airplane centerline) must be protected from head injury.
 - FAA invited comments from a working group (seat suppliers are part of it) in order to freeze some of the parameters linked to:
 - Neck injury and Spine & torso injury

■ Test Impacts

- Change in HIC (head injury criteria) measurement require use of new dummy with more neck movement possibilities
- Before

After

- Additional sensors on torso required for additional measurements

What we encountered

- **Development delays in H1**
 - Owing to many Head of Version (HoV) to develop resulting in overwhelming the engineering and design teams
 - Delays in certification programs
- **Difficulties in ramping up production in H2 2013/2014**
 - Supply chain under pressure
 - Strong ramp up to cope with
 - With the priority to deliver our customers
- **Resulting in extra costs / production variances**
 - Need to set parallel production lines
 - Cost of supply / late ordering
 - Extra labor costs
 - Air Freight
 - Customer claims for penalties
- **H2 13/14 and H1 14/15 under pressure**
 - Strike at Zodiac Seats US in October

The recovery plan

▪ Customer First

- Quickly return to normal On Time Delivery performance
- Temporary extra costs for production
 - Labor, shipping...
- Burn down delays

▪ Adapt organization

- More centralization at segment level
- Enhance the robustness of processes
- Improve supply chain control and tackle shortages

▪ Increase capacity

- Additional production capacity
- Extra staffing for operations
- Tackle supply chain shortages

Outlook

Outlook

- **Good prospect growth for sales**
 - Organic growth will continue, fuelled by traffic growth
 - Capability to follow external growth opportunities

- **A better currency environment**
 - 73% of net budgeted \$ transaction exposure for 2014/15 is hedged at 1.28
 - Sensitivity to dollar (all cross) is 115 bp for 10 cents change

- **COI margin to improve**
 - Recovery plan in Seats will allow to progressively restore margin to Group standard levels
